חזון ומטרות 🍯

חזון

להפוך לפלטפורמת הסחר הדיגיטלית המובילה באפריקה - לוח מודעות נגיש, רב-לשוני ומותאם תרבותית שלו שמאפשר לכל אדם באפריקה לקנות, למכור ולהתחבר לקהילה המקומית שלו.

מטרות עסקיות

• מודעות באוגנדה 1: 100,000 משתמשים פעילים, 50,000 מודעות באוגנדה

• **שנה 2**: הרחבה ל-3 מדינות נוספות, 500,000 משתמשים

• מדינות, מיליון משתמשים, רווחיות מלאה

• שנה 5: פלטפורמה מובילה ב-20 מדינות באפריקה

מטרות טכניות

3 זמן טעינה: מתחת ל-3 שניות ברשת G

99.9% זמינות: uptime

• תמיכה: 500,000 משתמשים במקביל

• אבטחה: אפס פרצות מידע

מחקר שוק ותחרות 📊

התחרות הקיימת

פלטפורמה	נוכחות באפריקה	חוזקות	חולשות	איך נתמודד
OLX	ניגריה, קניה, גאנה	מותג חזק, משאבים	לא מותאם מקומית	אינטגרציה עמוקה עם טלגרם
Jiji	ניגריה, קניה, אוגנדה	עיצוב טוב	מועט אינטגרציות מקומיות	שילוב עם תשלומים מקומיים
PigiaMe	קניה, תנזניה	מכירות רכב חזקות	ממשק מיושן	UX מודרני ומהיר
Tonaton	גאנה	נוכחות מוקדמת	מועט תכונות	בוט טלגרם אוטומטי

הזדמנויות שוק

• **74**% 35 מ**האוכלוסייה באפריקה** מתחת לגיל

• 456 מיליון משתמשי אינטרנט נייד

• 67% מהעסקים הם עסקים קטנים בלתי פורמליים

• עלייה של 23% בשנה בסחר אלקטרוני

👥 קהל יעד ופרסונות

פרסונה 1: **אמלי - סטודנטית** (23, קמפלה)

• צרכים: למכור מדי פעם ציוד לימודים, לקנות בגדים בזול

• מכשירים: סמארטפון אנדרואיד, אינטרנט ברחוב/אוניברסיטה

• **שפות**: אנגלית + לוגנדה

• **התנהגות**: משתמשת בטלגרם יומיומית, WhatsApp

פרסונה 2: דייוויד - נהג טקסי (34, אנטבה)

• צרכים: למכור/לקנות רכבים, חלקי חילוף, שירותי תחזוקה

• מכשירים: טלפון בסיסי עם אינטרנט חלקי

• **שפות**: אנגלית פשוטה + לוגנדה

• התנהגות: יעדיף טלפון על אפליקציות

פרסונה 3: גרייס - בעלת עסק קטן (41, מברארה)

• **צרכים**: לפרסם מוצרים בזול, לקבל לידים

• מכשירים: סמארטפון, מחשב בבית

• **שפות**: אנגלית + רואנדה

• בתנהגות: פעילה ברשתות חברתיות, משתמשת ב-

פרסונה 4: ז'**אן - מבקר מחו"ל** (28, פריס*←*קמפלה)

• צרכים: לקנות ציוד מקומי, למצוא שירותים

• מכשירים: iPhone, אינטרנט מהיר

• **שפות**: צרפתית + אנגלית

• התנהגות: מצפה לממשק מהיר ובטוח

מפת הבעיה והפתרון 🍱

🔎 בעיות קיימות

בעיה	השפעה	תדירות	חומרה
חוסר פלטפורמה מאוחדת	משתמשים מפוזרים	גבוהה	קריטית
מחסום שפה	החרגת קהלים	גבוהה	גבוהה
חוסר אמון במוכרים	עסקאות נכשלות	בינונית	גבוהה
אינטרנט איטי/יקר	נשירה גבוהה	גבוהה	בינונית
חוסר תשלומים מקומיים	עסקאות מורכבות	גבוהה	בינונית

א פתרונות של Nunuza

פתרון	יתרון תחרותי	קלות יישום
טלגרם כפלטפורמה ראשית	אף אחד לא עושה את זה	קל
שפות מקומיות 3	מותאמות לקהל היעד	בינוני
מערכת reputation	בניית אמון	בינוני
PWA + אתר מהיר	עובד גם על חיבור חלש	קל
Mobile Money integration	תשלומים מקומיים	קשה

🦃 דרישות פונקציונליות

(MVP) פונקציות ליבה

הרשמה והתחברות .1

- רישום דרך טלגרם (Telegram Login Widget)
- רישום דרך טלפון (SMS OTP)
- רישום דרך אימייל + סיסמה
- התחברות דרך Google/Facebook (2 שלב)

2. ניהול פרופיל משתמש

- שינוי פרטים אישיים
- בחירת שפת ממשק
- (מדינה + עיר)
- העלאת תמונת פרופיל
- הגדרת שיטות קשר מועדפות

3. פרסום מודעות

- בחירת קטגוריה מתוך 15 קטגוריות ראשיות
- (כותרת, תיאור, מחיר)
- העלאת עד 10 תמונות
- (מדינה, עיר, שכונה)
- בחירת שיטות יצירת קשר
- שמירה כטיוטה / שליחה לאישור

4. דפדוף וחיפוש מודעות

- צפייה לפי קטגוריות
- סינון לפי מיקום, מחיר, תאריך
- חיפוש טקסט חופשי
- מיון לפי: חדשות, מחיר, פופולריות
- שמירת מודעות למועדפים

עמוד מודעה יחידה 5.

- גלריית תמונות עם זום
- כל פרטי המודעה
- (שם, ציון אמינות)
- טלגרם, טלפון) כפתורי יצירת קשר, WhatsApp)
- כפתור שיתוף
- אפשרות דיווח על מודעה

(Admin) פונקציות ניהול

פאנל ניהול מודעות .1

- רשימת מודעות ממתינות לאישור
- צפייה מוקדמת במודעה
- אישור/דחייה עם הודעה למשתמש
- עריכת מודעות (במקרי צורך)
- מחיקת מודעות לא הולמות

2. ניהול משתמשים

- רשימת משתמשים + פרטים
- חסימת/ביטול חסימת משתמשים
- עריכת ציוני אמינות
- שליחת הודעות למשתמשים

3. **ניהול תוכן**

- עריכת קטגוריות
- ניהול רשימת מדינות וערים
- עדכון תרגומים
- ניהול תמונות ברירת מחדל

🤳 פונקציות מתקדמות (שלב 2)

- 1. מערכת הודעות פנימית
- 2. מערכת ביקורות ודירוגים
- מודעות ממומנות .3
- 4. אינטגרציה עם WhatsApp Business
- מערכת תשלומים מקומיים 5.

דארכיטקטורה טכנית 🔼

Frontend Stack

javascript

טכנולוגיות ליבה //

- Next.js 14 (App Router) SSR/SSG for SEO
- TypeScript Type safety
- Tailwind CSS Responsive design
- React Hook Form + Zod Form validation
- Zustand State management
- React Query Server state management
- react-i18next Internationalization

// UI Components

- Headless UI Accessible components
- React Hot Toast Notifications
- Framer Motion Animations
- React Image Gallery Image viewing
- React Select Advanced selects

// PWA & Performance

- next-pwa Progressive Web App
- next-optimized-images Image optimization
- next-bundle-analyzer Bundle analysis

Backend Architecture

javascript // Primary

// Primary Backend

Supabase (PostgreSQL + Auth + Storage + Edge Functions)

// External Services

- Cloudinary Image storage & optimization
- Telegram Bot API Bot integration
- Twilio SMS authentication
- SendGrid Email notifications

// Deployment & CDN

- Vercel Frontend hosting
- Cloudflare CDN & security
- Upstash Redis Caching layer

Database Design Philosophy

- Single Source of Truth: Supabase PostgreSQL
- Relational Integrity: Foreign keys with cascades
- Soft Deletes: Never hard delete user data

- Audit Trail: Track all changes with timestamps
- Scalability: Designed for 1M+ records per table

מסד נתונים מפורט 🖥

Schema Overview

sql
-- Core Tables
users, posts, categories, countries, cities
-- Feature Tables
favorites, reports, notifications, admin_actions
-- Analytics Tables
page_views, search_queries, user_sessions
-- Configuration Tables

app_settings, translations, featured_posts

1 Table: users

```
CREATE TABLE users (
 id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
 -- Authentication
 email VARCHAR(255) UNIQUE,
 phone VARCHAR(20) UNIQUE,
 telegram_id BIGINT UNIQUE,
 password_hash TEXT, -- null for social login
 email_verified BOOLEAN DEFAULT false,
 phone_verified BOOLEAN DEFAULT false,
 -- Profile
 username VARCHAR(50) NOT NULL,
full_name VARCHAR(100),
 avatar_url TEXT,
 bio TEXT,
 -- Preferences
 language user_language DEFAULT 'en',
 country VARCHAR(2) NOT NULL, -- ISO code
 city VARCHAR(100),
 timezone VARCHAR(50) DEFAULT 'Africa/Kampala',

h2 { font-size: 1.5rem; } /* 24px */
 body { font-size: 1rem; } /* 16px */
}
```

🗎 אבטחה ופרטיות

Authentication & Authorization

```
javascript
// JWT Token Strategy
{
 "sub": "user_uuid",
 "role": "user|moderator|admin",
 "email": "user@example.com",
 "telegram_id": "123456789",
 "exp": 1640995200,
 "iat": 1640908800
}
// Session Management
- Access Token: 15 minutes expiry
- Refresh Token: 30 days expiry
- Remember Me: 90 days expiry
- Automatic token refresh on API calls
```

Row Level Security (RLS) Policies

```
-- Users can only see active posts

CREATE POLICY "Public posts are viewable by everyone" ON posts

FOR SELECT USING (status = 'approved' AND deleted_at IS NULL);

-- Users can only edit their own posts

CREATE POLICY "Users can update own posts" ON posts

FOR UPDATE USING (auth.uid() = user_id);

-- Only admins can approve posts

CREATE POLICY "Admins can approve posts" ON posts

FOR UPDATE USING (auth.jwt() ->> 'role' = 'admin');

-- Users can only see their own favorites

CREATE POLICY "Users can view own favorites" ON favorites

FOR SELECT USING (auth.uid() = user_id);
```

Data Protection

```
javascript
// Personal Data Encryption
const encryptPersonalData = (data) => {
  return CryptoJS.AES.encrypt(data, process.env.ENCRYPTION_KEY).toString();
};

// Phone Number Masking
const maskPhone = (phone) => {
  return phone.replace(/(\+\d{3})\d{6}(\d{3})/, '$1*****$2');
};

// Email Masking
const maskEmail = (email) => {
  const [user, domain] = email.split('@');
  return `${user.slice(0,2)}***@${domain}`;
};
```

Content Moderation

javascript

```
// Automated Content Filtering
const contentModerationRules = {
 profanity: {
  languages: ['en', 'fr', 'sw'],
  action: 'flag_for_review'
},

Rate Limiting

```
javascript
// API Rate Limits (per IP per hour)
const rateLimits = {
 '/api/auth/register': 5,
 '/api/auth/login': 10,
 '/api/posts': 20, // Create posts
 '/api/search': 100,
 '/api/upload': 30,
 '/api/contact': 10 // Contact seller
};
// Supabase RLS + Custom Middleware
const rateLimitMiddleware = async (req, res, next) => {
 const ip = req.ip;
 const endpoint = req.path;
 const limit = rateLimits[endpoint] || 60;
 const count = await redis.incr(`rate_limit:${ip}:${endpoint}`);
 if (count === 1) {
  await redis.expire(`rate_limit:${ip}:${endpoint}`, 3600);
 }
 if (count > limit) {
  return res.status(429).json({ error: 'Rate limit exceeded' });
 }
 next();
};
```

GDPR Compliance

```
javascript
```

```
// Data Export
const exportUserData = async (userId) => {
 const userData = await supabase
  .from('users')
  .select('*')
  .eq('id', userId)
  .single();
 const userPosts = await supabase
  .from('posts')
  .select('*')
  .eq('user_id', userId);
 return {
  profile: userData.data,
  posts: userPosts.data,
  favorites: [], // ... other data
  exportDate: new Date().tolSOString()
};
};
// Data Deletion (Right to be Forgotten)
const deleteUserData = async (userId) => {
// Soft delete user
 await supabase
  .from('users')
  .update({
   deleted_at: new Date().tolSOString(),
   email: null,
   phone: null,
   telegram_id: null
  })
  .eq('id', userId);
 // Anonymize posts
 await supabase
  .from('posts')
  .update({
   contact_phone: null,
   contact_email: null,
   contact_telegram: null
  })
  .eq('user_id', userId);
};
```

Internationalization Strategy

```
// Supported Languages
const languages = {
 en: {
  name: 'English',
  nativeName: 'English',
  dir: 'ltr',
  currency: 'UGX', // Default for Uganda
  dateFormat: 'DD/MM/YYYY',
  timeFormat: '24h'
},
 fr: {
  name: 'French',
  nativeName: 'Français',
  dir: 'ltr',
  currency: 'XAF', // Central African Franc
  dateFormat: 'DD/MM/YYYY',
  timeFormat: '24h'
 },
 sw: {
  name: 'Swahili',
  nativeName: 'Kiswahili',
  dir: 'ltr',
  currency: 'TZS', // Tanzanian Shilling
  dateFormat: 'DD/MM/YYYY',
  timeFormat: '24h'
}
};
// Translation File Structure
locales/
---- en/
  ---- common.json
                         # Navigation, buttons, etc.
  auth.json
                      # Login, register, etc.
  ---- posts.json
                      # Post creation, viewing

   ---- sw/
       — ... (same structure)
```

javascript

Translation Management

```
javascript
```

```
// Dynamic Translation Loading
const useTranslation = (namespace = 'common') => {
 const { language } = useContext(LanguageContext);
 const [translations, setTranslations] = useState({});
 useEffect(() => {
  import(`../locales/${language}/${namespace}.json`)
   .then(setTranslations);
 }, [language, namespace]);
 const t = useCallback((key, params = {}) => {
  let translation = translations[key] || key;
  // Replace parameters
  Object.entries(params).forEach(([param, value]) => {
   translation = translation.replace(`{{${param}}}}`, value);
  });
  return translation;
 }, [translations]);
 return { t };
};
// Usage Examples
const { t } = useTranslation('posts');
// Simple translation
<h1>{t('create_post_title')}</h1>
// With parameters
{t('post_views_count', { count: 1234 })}
// → "This post has been viewed 1,234 times"
// Pluralization
<span>{t('posts_count', { count: posts.length })}</span>
// \rightarrow "1 post" or "5 posts"
```

Currency & Pricing

javascript // Currency Configuration const currencies = { UGX: { symbol: 'USh', decimals: 0, rate: 1 }, KES: { symbol: 'KSh', decimals: 0, rate: 0.092 }, TZS: { symbol: 'TSh', decimals: 0, rate: 0.115 }, USD: { symbol: '\$', decimals: 2, rate: 0.00027 }, EUR: { symbol: '€', decimals: 2, rate: 0.00024 } **}**; // Price Formatting const formatPrice = (amount, currency = 'UGX', locale = 'en') => { const config = currencies[currency]; return new Intl.NumberFormat(locale, { style: 'currency', currency: currency, minimumFractionDigits: config.decimals, maximumFractionDigits: config.decimals }).format(amount);

Country-Specific Features

// formatPrice(50000, 'UGX', 'en') → "USh 50,000"

// formatPrice(50000, 'USD', 'en') → "\$13.50"

};

// Examples:

```
// Country Configuration
const countries = {
 UG: { // Uganda
  name: 'Uganda',
  currency: 'UGX',
  languages: ['en', 'sw'],
  phonePrefix: '+256',
  popular_categories: ['electronics', 'vehicles', 'real_estate'],
  payment_methods: ['mtn_money', 'airtel_money', 'cash'],
  business_hours: '08:00-18:00'
 },
 KE: { // Kenya
  name: 'Kenya',
  currency: 'KES',
  languages: ['en', 'sw'],
  phonePrefix: '+254',
  popular_categories: ['electronics', 'fashion', 'vehicles'],
  payment_methods: ['mpesa', 'airtel_money', 'cash'],
  business_hours: '08:00-17:00'
 },
 TZ: { // Tanzania
  name: 'Tanzania',
  currency: 'TZS',
  languages: ['sw', 'en'],
  phonePrefix: '+255',
  popular_categories: ['agriculture', 'electronics', 'real_estate'],
  payment_methods: ['tigo_pesa', 'mpesa', 'cash'],
  business hours: '08:00-17:00'
}
};
// Location-based Content
const getLocalizedContent = (countryCode, category) => {
 const country = countries[countryCode];
 return {
  currency: country.currency,
  paymentMethods: country.payment_methods,
  suggestedPriceRange: getSuggestedPrices(category, country.currency),
  businessHours: country.business_hours,
  popularInCategory: country.popular_categories.includes(category)
};
};
```

Telegram Integration

```
// Telegram Bot Configuration
const telegramBot = {
 botToken: process.env.TELEGRAM_BOT_TOKEN,
 webhookUrl: `${process.env.BASE_URL}/api/telegram/webhook`,
 channelld: process.env.TELEGRAM_CHANNEL_ID,
 // Commands
 commands: [
  { command: 'start', description: 'Start using Nunuza Bot' },
  { command: 'search', description: 'Search for posts' },
  { command: 'post', description: 'Create a new post' },
  { command: 'myads', description: 'View your posts' },
  { command: 'help', description: 'Get help' }
 ]
};
// Auto-post approved listings to channel
const postToTelegramChannel = async (post) => {
 const message = `
**${post.title}**
${formatPrice(post.price, post.currency)}
$\{\text{post.city}\}, \$\{\text{post.country}\}
Contact: @${post.user.telegram_username}
${post.description.substring(0, 200)}...
View full post: ${process.env.BASE_URL}/listing/${post.id}
#${post.category.slug} #${post.city.toLowerCase()}
 const photoUrl = post.images[0]; // First image
 if (photoUrl) {
  await bot.sendPhoto(telegramBot.channelld, photoUrl, {
   caption: message,
   parse_mode: 'Markdown'
  });
 } else {
  await bot.sendMessage(telegramBot.channelld, message, {
   parse_mode: 'Markdown'
  });
 }
};
```

```
// Telegram Login Widget Integration
const TelegramLoginButton = () => {
 useEffect(() => {
  window.onTelegramAuth = (user) => {
   // Handle Telegram authentication
   const authData = {
    id: user.id,
    username: user.username,
    first_name: user.first_name,
    last_name: user.last_name,
    photo_url: user.photo_url,
    auth_date: user.auth_date,
    hash: user.hash
   };
   // Verify and login user
   handleTelegramLogin(authData);
  };
  // Load Telegram Widget
  const script = document.createElement('script');
  script.src = 'https://telegram.org/js/telegram-widget.js?22';
  script.setAttribute('data-telegram-login', 'NunuzaBot');
  script.setAttribute('data-size', 'large');
  script.setAttribute('data-onauth', 'onTelegramAuth(user)');
  script.setAttribute('data-request-access', 'write');
  document.body.appendChild(script);
  return () => document.body.removeChild(script);
 }, []);
 return <div id="telegram-login-widget" />;
};
```

Cloudinary Integration

```
// Image Upload Configuration
const cloudinaryConfig = {
 cloudName: process.env.CLOUDINARY_CLOUD_NAME,
 uploadPreset: process.env.CLOUDINARY_UPLOAD_PRESET,
 folder: 'nunuza/posts',
 // Transformation presets
 transformations: {
  thumbnail: 'w_300,h_200,c_fill,q_auto:good',
  gallery: 'w_800,h_600,c_fit,q_auto:good',
  original: 'q_auto:best',
  watermark: 'l_nunuza_logo,g_south_east,o_30'
}
};
// Multi-file Upload Component
const ImageUploader = ({ onUpload, maxFiles = 10 }) => {
 const [uploading, setUploading] = useState(false);
 const [uploadedImages, setUploadedImages] = useState([]);
 const handleUpload = async (files) => {
  setUploading(true);
  const uploadPromises = Array.from(files).map(async (file) => {
   const formData = new FormData();
   formData.append('file', file);
   formData.append('upload_preset', cloudinaryConfig.uploadPreset);
   formData.append('folder', cloudinaryConfig.folder);
   const response = await fetch(
    `https://api.cloudinary.com/v1_1/${cloudinaryConfig.cloudName}/image/upload`,
    { method: 'POST', body: formData }
   );
   return response.json();
  });
  try {
   const results = await Promise.all(uploadPromises);
   const imageUrls = results.map(result => result.secure_url);
   setUploadedImages(prev => [...prev, ...imageUrls]);
   onUpload(imageUrls);
  } catch (error) {
   console.error('Upload failed:', error);
  } finally {
   setUploading(false);
  }
```

```
};
 return (
  <div className="image-uploader">
   <input
    type="file"
    multiple
    accept="image/*"
    onChange={(e) => handleUpload(e.target.files)}
    disabled={uploading || uploadedImages.length >= maxFiles}
   />
   {uploading && <div>Uploading...</div>}
   <div className="uploaded-images">
    {uploadedImages.map((url, index) => (
     <img
      key={index}
      src=\{url.replace('/upload/', `/upload/$\{cloudinaryConfig.transformations.thumbnail\}/`)\}
      alt={`Upload ${index + 1}`}
     />
    ))}
   </div>
  </div>
);
};
```

SMS Integration (Twilio)

```
javascript
// SMS Authentication
const sendSMSVerification = async (phoneNumber) => {
 const otp = Math.floor(100000 + Math.random() * 900000).toString();
// Store OTP in Redis with 5-minute expiry
 await redis.setex(`sms_otp:${phoneNumber}`, 300, otp);
// Send SMS via Twilio
 const message = await twilio.messages.create({
  body: 'Your Nunuza verification code is: ${otp}. Valid for 5 minutes.',
  from: process.env.TWILIO_PHONE_NUMBER,
  to: phoneNumber
 });
 return { success: true, messageId: message.sid };
};
// SMS Notifications for Post Updates
const notifyViaSMS = async (phoneNumber, message) => {
 if (!phoneNumber.startsWith('+')) {
  phoneNumber = '+256' + phoneNumber; // Default Uganda prefix
 }
 await twilio.messages.create({
  body: message,
  from: process.env.TWILIO_PHONE_NUMBER,
  to: phoneNumber
```

await notifyViaSMS(user.phone, `Your post "\${post.title}" has been approved and is now live!`);

WhatsApp Business Integration

});
};

// Usage

```
javascript
```

```
// WhatsApp Contact Button
const WhatsAppButton = ({ phoneNumber, message }) => {
 const encodedMessage = encodeURIComponent(message);
 const whatsappUrl = `https://wa.me/${phoneNumber}?text=${encodedMessage}`;
 return (
  <a
   href={whatsappUrl}
   target="_blank"
   rel="noopener noreferrer"
   className="whatsapp-button"
   Contact via WhatsApp
  </a>
);
};
// Auto-generated contact message
const generateContactMessage = (post, viewer) => {
 return `Hi! I'm interested in your "${post.title}" posted on Nunuza. Is it still available?`;
};
```

Payment Integration (Future)

```
javascript
// Mobile Money Integration
const mobileMoneyProviders = {
 UG: [
  { name: 'MTN Mobile Money', code: 'mtn_ug', prefix: '+256' },
  { name: 'Airtel Money', code: 'airtel_ug', prefix: '+256' }
],
 KE: [
  { name: 'M-Pesa', code: 'mpesa_ke', prefix: '+254' },
  { name: 'Airtel Money', code: 'airtel_ke', prefix: '+254' }
]
};
const initiateMobilePayment = async (amount, currency, provider, phone) => {
// This would integrate with local payment processors
 // like Flutterwave, Paystack, or direct APIs
 const paymentRequest = {
  amount,
  currency,
  provider,
  phone,
  reference: generatePaymentReference(),
  callback_url: `${process.env.BASE_URL}/api/payments/callback`
 };
 // Integration with payment processor
 const response = await fetch(`${paymentProvider.baseUrl}/charges`, {
  method: 'POST',
  headers: {
   'Authorization': `Bearer ${paymentProvider.secretKey}`,
   'Content-Type': 'application/json'
  },
  body: JSON.stringify(paymentRequest)
 });
 return response.json();
};
```

💰 מודל עסקי ומוניטיזציה

Revenue Streams

1. מודעות ממומנות (Featured Listings)

```
const featuredPlans = {

וֹמדדי הצלחה (KPls) מדדי הצלחה

Primary Metrics

```
const primaryKPIs = {
 userGrowth: {
  totalUsers: {
   target: { month3: 10000, month6: 25000, year1: 100000 },
   measurement: 'Total registered users',
   tracking: 'Daily cohorts, acquisition channels'
  },
  activeUsers: {
   target: { month3: 2500, month6: 8000, year1: 30000 },
   measurement: 'Monthly Active Users (MAU)',
   definition: 'Users who log in at least once per month'
  },
  retention: {
   target: { day1: 0.7, week1: 0.4, month1: 0.25 },
   measurement: 'Cohort-based retention rates',
   tracking: 'New user behavior analysis'
  }
 },
 engagement: {
  postsPublished: {
   target: { month3: 5000, month6: 15000, year1: 50000 },
   measurement: 'Total approved posts',
   quality: 'Average approval rate >85%'
  },
  postViews: {
   target: { month3: 100000, month6: 500000, year1: 2000000 },
   measurement: 'Total post page views',
   tracking: 'Views per post, popular categories'
  },
  contactRate: {
   target: 0.15, // 15% of viewers contact seller
   measurement: 'Contact clicks / Post views',
   optimization: 'A/B test contact buttons'
  }
 },
 revenue: {
  monthlyRevenue: {
   target: { month6: 5000000, year1: 30000000 }, // UGX
   measurement: 'Total monthly recurring revenue',
   breakdown: 'Featured posts, subscriptions, ads'
```

```
},
averageRevenuePerUser: {
  target: { year1: 300000 }, // UGX per paying user
  measurement: 'Revenue / Paying users',
  optimization: 'Upselling strategies'
  }
}
```

Secondary Metrics

```
const secondaryKPIs = {
 contentQuality: {
  approvalRate: {
   target: 0.85, // 85% of posts approved
   measurement: 'Approved posts / Total submissions',
   actionable: 'Improve content guidelines'
  },

🚇 היבטים משפטיים

Terms of Service

Nunuza Terms of Service

1. User Eligibility

- Users must be 18+ years old
- Users must provide accurate information
- One account per person/business
- Prohibited users: Previously banned users, competitors engaging in harmful activities

2. Content Policy

Allowed Content:

- Legal items and services
- Accurate descriptions and pricing
- Original or authorized images
- Local and international products

Prohibited Content:

- Illegal items (drugs, weapons, stolen goods)
- Adult/explicit content
- Misleading or fraudulent listings
- Copyrighted material without permission
- Personal information of others

3. User Responsibilities

- Accuracy of listings
- Honoring posted prices
- Timely communication with buyers
- Following local laws and regulations
- Reporting suspicious activity

4. Platform Responsibilities

- Providing reliable service (99.9% uptime target)
- Moderating content within 24 hours
- Protecting user data
- Facilitating safe transactions
- Customer support in 3 languages

5. Payment and Refunds

- Featured post payments are non-refundable
- Business subscriptions can be cancelled with 30-day notice
- Disputed charges handled within 14 days
- Local currency pricing may fluctuate

6. Intellectual Property

- Users retain rights to their content
- Nunuza has license to display and promote content
- Users cannot use Nunuza branding without permission

- DMCA takedown process available

7. Limitation of Liability

- Nunuza is a platform, not a party to transactions
- Users transact at their own risk
- Maximum liability limited to subscription fees
- No warranties on transaction outcomes

8. Dispute Resolution

- Users encouraged to resolve disputes directly
- Mediation services available for premium users
- Arbitration in Uganda for legal disputes
- Class action waiver (where legally permitted)

Privacy Policy

Nunuza Privacy Policy

Information We Collect

Account Information:

- Email address, phone number, username
- Telegram ID (if using Telegram login)
- Profile photo and bio
- Location (country and city)

Usage Information:

- Posts created, viewed, favorited
- Search queries and filters used
- Device information and IP address
- App usage patterns and preferences

Communication Data:

- Messages sent through our platform
- Contact information shared in listings
- Support ticket conversations

How We Use Information

- Provide and improve our services
- Personalize user experience
- Send important notifications
- Prevent fraud and abuse
- Comply with legal obligations
- Market research and analytics

Information Sharing

We Share Information With:

- Other users (as you choose to display)
- Service providers (Cloudinary, Telegram, etc.)
- Legal authorities (when required by law)
- Business partners (with consent)

We Do NOT Share:

- Personal information for marketing by others
- Private messages or phone numbers
- Financial information
- Location data beyond city level

Data Protection

- Encryption of sensitive data
- Regular security audits
- Limited employee access
- Secure data centers

- Regular backups

User Rights

- Access your data
- Correct inaccurate information
- Delete your account
- Export your data
- Opt out of marketing communications

International Transfers

- Data processed in secure facilities
- Adequate protection standards maintained
- User consent for necessary transfers

Children's Privacy

- Service not intended for users under 18
- No knowing collection of children's data
- Immediate deletion if discovered

Contact Information

- Privacy Officer: privacy@nunuza.com
- Data Protection: data@nunuza.com
- General Inquiries: hello@nunuza.com

```
javascript
```

```
const implementationSteps = {
 immediate: [
  '1. Set up development environment with Cursor',
  '2. Initialize Next.js project with TypeScript',
  '3. Configure Supabase database and authentication',
  '4. Set up Tailwind CSS and basic components',
  '5. Implement user registration and login',
  '6. Create post creation and listing features',
  '7. Add admin panel for content moderation',
  '8. Integrate Telegram bot functionality',
  '9. Implement multi-language support',
  '10. Deploy to Vercel and configure domain'
 ],
 testing: [
  'Set up automated testing with Jest and Cypress',
  'Implement continuous integration with GitHub Actions',
  'Configure error monitoring with Sentry',
  'Set up performance monitoring',
  'Conduct security testing and audit'
 1,
 launch: [
  'Beta testing with selected users',
  'Content seeding and category setup',
  'Marketing material preparation',
  'Support documentation creation',
  'Go-live and monitoring setup'
 ]
};
```

סיכום ומסקנות 🍯

לייחודי Nunuza מה הופך את

- 1. **אינטגרציה עמוקה עם טלגרם** ממנף פלטפורמה פופולרית באפריקה
- 2. **מקומית** מותאם לתרבות, שפה ואמצעי תשלום מקומיים
- 3. **עובד על חיבורים איטיים ומכשירים בסיסיים**
- 4. שילוב של Al מודרציה איכותית שילוב של
- 5. **מודל עסקי בר-קיימא** מספר זרמי הכנסה מגוונים

גורמי הצלחה קריטיים

- 1. **ביצוע טכני מעולה** פלטפורמה מהירה, יציבה ובטוחה
- חוויית משתמש יוצאת דופן פשוטה, אינטואיטיבית ומהנה .2
- קהילה חזקה בניית אמון ומעורבות משתמשים .3
- שיווק יעיל הבנת השוק המקומי ובניית מותג חזק .4
- 5. **צוות מוכשר** מפתחים, משווקים ומנהלים מקצועיים

המלצות לביצוע

- ממוקד עם תכונות הכרחיות בלבד MVP **התחלה קטנה וחכמה** 1.
- **משוב משתמשים מתמיד** שיפור מתמיד על בסיס נתונים .2
- **3**. **בניית קהילה מיום ראשון** השקעה בקשרי לקוחות ותמיכה
- 4. מדידה וניתוח מעקב אחר מדדים חשובים ובחינת ביצועים
- גמישות ויכולת הסתגלות מוכנות לשינויים על בסיס תגובות השוק. 5

הצלחה צפויה

עם ביצוע נכון של התכנית המפורטת, Nunuza עתיד להפוך לפלטפורמת הסחר המובילה באפריקה המזרחית תוך 3-5. שנים, עם פוטנציאל להרחבה קונטיננטלית ויציאה למדדים בינלאומיים

העתיד מתחיל היום - בואו נבנה את Nunuza! 🖋

מסמך זה מהווה מפרט מקיף לפיתוח פלטפורמת Nunuza. הוא כולל את כל ההיבטים הדרושים להצלחה: טכנולוגיה, איצוב, עסק, שיווק, משפט, וחזון עתידי.

1.0 :גרסה

תאריך עדכון אחרון: יולי 2025

סטטוס: מוכן ליישום
